#### TEXT

*Twilight* is a 2008 American romantic vampire film based on a popular novel. The film stars Kristen Stewart and Robert Pattinson and it is the first in The Twilight Saga film series. It focuses on the development of the relationship between Bella Swan (a teenage girl) and Edward Cullen (a vampire), and the efforts of Cullen and his family to keep Swan safe from a group of evil vampires.

The project was developed for approximately three years at Paramount Pictures; during this time, a screen adaptation that differed significantly from the novel was written. Summit Entertainment acquired the rights to the novel after three years of the project's development. Principal photography took 44 days. By May 2, 2008 the film, primarily shot in Oregon, had been completed.

*Twilight* was theatrically released on November 21, 2008, obtaining over US\$392 million worldwide. It was released on DVD March 21, 2009, and became the most purchased DVD of the year. The soundtrack was released on November 4, 2008. Following the film's success, *New Moon* and *Eclipse*, the next two novels in the series, were produced as films the following year.

TEXT

For most teenagers, playing video games is just another recreational activity they enjoy with friends. The problem comes when video game playing becomes an addictive or isolating activity.

Parents should be aware of these issues relating to teenagers and video games:

According to a British official report released in January of 2008, 23% of the players surveyed admitted that they felt addicted to video games.

Some teenagers are heavy users of online role-playing games (RPGs) such as *World of Warcraft* and multiplayer games such as *Call of Duty* in which they interact with other players in real time. Students will often neglect schoolwork and other aspects of their daily lives when they become immersed in these games. While it remains unclear whether this can be termed an "addiction," the American Medical Association has identified "video game overuse" as a behaviour, and may include it in a future edition of the *Diagnostic and Statistical Manual of Mental Disorders*.

Children who are heavy users of video games may also be getting less exercise and develop poor eating habits. Make sure that your teen goes out and does not eat too much unhealthful food while gaming.

According to the book *Grand Theft Childhood* by Doctors Cheryl Olson and Lawrence Kutner, children who play violent video games are more likely to be involved in fights or bullying.
